Green Energy Technologies

No-72, First Floor, Sonu Plaza, Big Sowrastra Street,
Woraiyur, Trichy, Tamilnadu, India-620003.

Dear Sir,

Sub: Performance of HVAC Chiller Plant Energy Management System (CPEMS)-Reg.

This is to certify that we have been using the CPEMS on our HVAC Chiller Plant System (250TR*4Nos & its associated pumps and fans) using at CITYMAX Hotel, Bur Dubai, Dubai, UAE from Feb 2016. The CPEMS system has improved our Chiller plant efficiency from 1.23 KW/TR to 0.94KW/TR and achieved up to 23% energy savings on the Chiller plant Energy Consumption.

The system optimized the energy consumption of chillers, pumps and Condenser fans using an artificial intelligence-based dynamic control to achieve and maintain better plant efficiency across varying load profiles without affecting the comfort level of occupants.

The system also allowed for continuous improvement through remote monitoring, daily performance reports and data analytics that lead to immediate Corrective actions whenever necessary.

The after sales and services provided by you are good. We wish you shall extend the same in the coming years.

Thanks and Regards,

For Seven Stars Global LLC
